Python Developer with expertise in building scalable applications using Python, PySpark, and AWS. Skilled in developing and automating data processing, validation, and workflow optimization to improve efficiency and business outcomes. Experienced in streamlining processes and reducing manual effort through automation.

## RELEVANT WORK EXPERIENCE

### Cognizant Technology Solutions, Hyderabad, Telangana Life Annuity Insurance | Full Time

#### Python Developer (11/2023 - Present)

- Developed a scalable ETL framework using Python, PySpark, AWS Glue, and S3 to automate the transformation, validation, and ingestion of neutral files into standardized formats. Applied business rule-based transformations and loaded processed data into Sybase databases, ensuring data integrity and compliance.
- Developed an automated execution framework to orchestrate and streamline the sequential execution of multiple Python scripts during the Novation weekend, eliminating manual intervention. Reduced processing time from 38 hours to 8 hours by enabling parallel execution and dependency-based triggering.
- Designed and integrated stored procedures to efficiently retrieve and process data from Sybase databases within PySpark-based Python scripts. Optimized query execution and reduced data retrieval latency to enhance ETL performance and downstream analytics.

### Cognizant Technology Solutions, Chennai, TamilNadu Life Insurance | Full Time

#### AWS Developer & Python Developer (03/2023 - 11/2023)

- Designed and implemented AWS Glue jobs, Lambda functions, DynamoDB, and EventBridge rules to automate data transformation workflows, enhancing efficiency and scalability.
- Developed a Glue job to reconcile financial discrepancies by cross-checking a 7-million-row file against multiple smaller datasets, ensuring data accuracy.
- Optimized SQL report generation by replacing 40 queries with a single Glue job using PySpark, reducing execution time from 4 hours to 30 minutes.

### Cognizant Technology Solutions, Chennai, TamilNadu Internship

#### ETL Developer & Python Developer (05/2022 - 09/2022)

- Developed Python scripts using PySpark and pandas to replace Informatica transformations, improving ETL efficiency and reducing dependency on legacy systems.

## Document Synopsis

### ATS Compliance

Your resume appears to be compliant with applicant tracking systems. Awesome!

---

### File Type

The file type of your resume is: **PDF document**.

This is one of the standard file types used for resumes. Great!

---

### File Size

The file size of your resume is: **104 KB**

This is small enough to likely avoid any transmission issues.

---

### Page Count

Your resume contains **2 pages**.

Great job! This matches the page count of the most effective resumes.

---

### Word Count

Your resume contains **1834 words**.

This is on the high end, so while there are no hard and fast rules when it comes to how many words should be on a resume, you may want to consider shortening your resume a little bit if possible.

## Data Identification

### Phone Number

We have successfully detected your phone number on your resume as: **9163037330**

If this is not your phone number, then you may be using an ATS-incompatible resume template or a strangely-formatted phone number.

## Whoops! We were unable to detect your e-mail address on your resume.

### E-mail Address

It's important to include your personal e-mail address on your resume so that potential employers will be able to contact you. If you did include your e-mail address, then you may be using an ATS-incompatible resume template or a strangely-formatted e-mail address.

---

## Oh no! We were unable to detect the URL to your LinkedIn profile your resume.

### LinkedIn URL

It's important to include this on your resume so that potential employers can see that you're taking your career and job search seriously. If you did include the URL to your LinkedIn profile on your resume, then you may be using an ATS-incompatible resume template.

---

## **Yikes! We were unable to detect an Education section on your resume.**

### **Education**

It's important to include one in order to showcase your academic achievements. If you did include an Education section, then you may be using an ATS-incompatible resume template or labeled the section with an unconventional name.

---

## **Oops! We were unable to detect a Work History section on your resume.**

### **Work History**

It's important to include one in order to showcase your past work experiences. If you did include a Work History section, then you may be using an ATS-incompatible resume template or labeled the section with an unconventional name.

---

## **Oh no! We were unable to detect a Skills/Achievements section on your resume.**

### **Skills / Achievements**

It's important to include one in order to showcase all the relevant skills and accomplishments you have that would be relevant for the job at hand. If you did include a Skills/Achievements section, then you may be using an ATS-incompatible resume template or labeled the section with an unconventional name.

---

**Date Formatting**

The dates on your resume appear to be formatted in a conventional manner. Great!

## Lexical Analysis

**Personal Pronouns**

Uh oh! We detected 5 occurrences of personal pronouns on your resume.

I

Personal pronouns like "I" and "me" violate standard resume etiquette, so we recommend removing them from your resume.

**Numericized Data**

You've done your due diligence to numericize your results. Good stuff!

**Vocabulary Level**

The vocabulary level on your resume is a **4.2** out of 10. This is on the low end, so we'd recommend trying to increase the complexity of the vocabulary on your resume if possible.

## Reading Level

The reading level on your resume is a **5.1** out of 10. Magnificent!

---

The following are some of the most frequently-used words on your resume:

Data

Pyth

Deve

----

## Common Words

Each of these words appear in your resume multiple times, which is a good thing! The words that appear the most often on your resume should help represent the archetype you are attempting to take on as a job seeker.

---

## Semantic Analysis

**Measurable Achievements**

th em \$18 0 00

The following are some of the measurable achievements listed on your resume (not all of them may be listed):

Your resume contains around **1** measurable achievement. This is on the low end, so we recommend including more bullet points numerically quantifying your contributions at past jobs.

**Soft Skills**

Your resume contains a total of around **0** soft skills. This is on the low end, so we'd recommend adding a few more soft skills on your resume.

**Hard Skills**

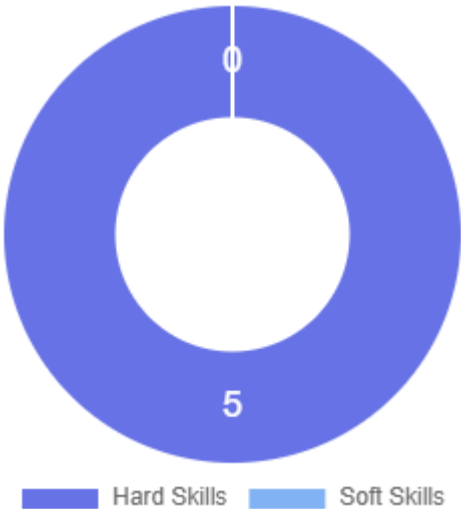

Etl   Git   Nu   Orc   Orca/modula-2

The following are some of the hard skills listed on your resume (not all skills may be listed):

Your resume contains a total of around **5** hard skills. This is on the low end, so we'd recommend adding a few more hard skills on your resume.

The skills efficiency ratio of your resume is **1.00**. Fabulous!

 Skills Efficiency Ratio

### New Study: What Is The Optimal Length Of Your Resume?

ResumeGo conducted a field experiment involving 7,287 job application submissions and a survey of 236 hiring professionals to get down to the bottom of exactly how integral cover letters are to job search success and what exactly employers value in them.

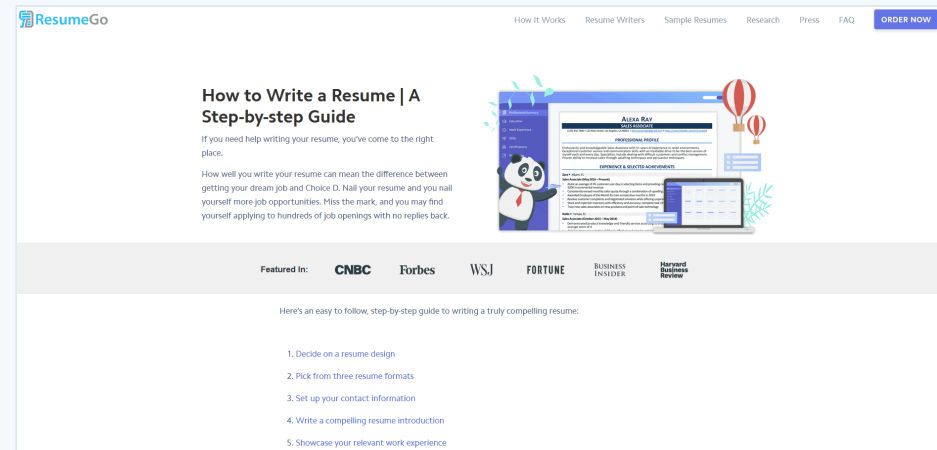

**New research finds that applications with tailored cover letters yield just over 50% more interviews compared to those without.**

Do cover letters matter at all? And if they do, exactly how important are they? Do I need to tailor my cover letter to each individual job opening? These are some of the most common questions that job applicants ask — and for good reason. After spending countless hours refining their resume and searching for job openings, most people feel too run-down to now write another whole letter
